### **Finnair to start flying on sustainable jet fuel out of Amsterdam Schiphol**

**Amsterdam July 14 – SkyNRG will supply Finnair with sustainable jet fuel this summer out of Amsterdam Schiphol. For its first biofuel flight SkyNRG will supply Finnair with jet fuel made from recycled vegetable oil in a mixture that is 50% biofuel and 50% standard fossil fuel. Finnair and SkyNRG have also agreed to jointly work on a structural supply chain, as both parties firmly believe that the adoption of "green routes" by airlines will help accelerate the development of sustainable and affordable jet fuels. Finnair is the third airline contracting with SkyNRG after KLM Royal Dutch Airlines and Thomson Airways.**

“We want to be a pioneer in sustainable development in air transport. SkyNRG’s leading approach in setting up innovative supply chains for truly sustainable jet fuel that is long term also affordable made them a logical partner for us” says Kati Ihamäki, Vice President, Sustainable Development at Finnair.

#### **About SkyNRG**

SkyNRG’s mission is to help create a sustainable future for aviation through actively developing a sustainable production chain for alternative aviation fuels. Today the market for these fuels is just emerging; SkyNRG is taking the first steps to make it a reality.

After two years of research and development the company has created a one-stop shop for airlines integrating the complete supply chain for sustainable jet fuels. From feedstock-to-flight, the supply chain covers elements such as strict selection of sustainable feedstock, refining contracts, distribution to any airport in the world, quality assurance, in to plane fuel service, insurance, marketing and project (co) funding with airports and end customers. For Finnair, SkyNRG partners with US refiner Dynamic Fuels and has used as feedstock the waste stream Used Cooking Oil.

SkyNRG does not commit to one single feedstock or technology. The sustainability of alternative aviation fuels depends on many factors and has to be assessed on a case-by-case basis. To make the right decisions now and in the future, SkyNRG is advised by an independent Sustainability Board, consisting of the Dutch wing of the World Wide Fund for Nature (WWF-NL), Solidaridad, and the Copernicus Institute of Utrecht University. Next to that, SkyNRG strives for harmonisation on certification of sustainable jet fuel and therefore actively supports the Roundtable on Sustainable Biofuels.
