

SkyNRG, Fly Green Fund and Swedavia enable sustainable aviation fuel flights from Gothenburg Landvetter Airport

Gothenburg Landvetter Airport May 18, 2017 – Today Swedavia, the largest Swedish airport operator, received its first volume of sustainable aviation fuel for 2017 at Gothenburg Airport. With this delivery, Swedavia takes a next step in reducing its entire business travel footprint from flying through its partnership with Fly Green Fund. The sustainable aviation fuel is produced by AltAir Fuels and supplied by SkyNRG together with Air BP.

Fly Green Fund was launched in 2015 and enables organizations and individuals in the Nordics to reduce their carbon footprint by flying on sustainable aviation fuel. Swedavia joined the fund as launching partner and is also on board as a corporate customer. Other Fly Green Fund partners are SAS, KLM, BRA and EFS.

“By joining Fly Green Fund two years ago we’ve taken an important and concrete step to reduce our climate impact. It’s great to see that our early involvement now really pays off and we’re proud to fly 100% fossil free in 2017,” says Charlotte Ljunggren, Airport Director Gothenburg Landvetter Airport, Swedavia.

“Swedavia’s support demonstrates that an airport can play an important role in making the aviation industry more sustainable. Swedavia has set a great example for airports worldwide and we hope this will motivate other organizations to follow their example and start flying sustainable,” says Theye Veen, CFO SkyNRG.

“We’re grateful that our partner and corporate customer Swedavia decided to continue to buy sustainable aviation fuel to reduce their carbon footprint and contribute to developing a sustainable future for aviation,” says Maria Fiskerud, CEO Fly Green Fund. “This is another milestone that gives us the opportunity to tell our story and give more people a chance to get to know us and join the Fly Green Fund.”

About SkyNRG

SkyNRG is the global market leader for sustainable aviation fuel (SAF), having supplied over 25 airlines on all continents worldwide. SkyNRG sources, blends and distributes SAF, guarantees sustainability throughout the supply chain and helps to co-fund the premium. At the same time, SkyNRG focuses on developing regional supply chains that offer a real sustainable and affordable alternative to fossil fuels. SkyNRG has its operations RSB certified and is structurally advised by an independent Sustainability Board in which the WWF-International, Solidaridad, European Climate Foundation and the Energy Academy Europe hold a seat. www.skynrg.com

About Fly Green Fund

The Fly Green Fund is a Nordic initiative founded by SkyNRG, NISA and Karlstad Airport, that enables organizations and individuals to reduce their carbon footprint by flying on bio jet fuel. It aims to secure the necessary funding to kick-start the market for sustainable jet fuel in the Nordics, by creating demand and at the same time supporting the development of production capacity from locally available feedstock. Swedavia, EFS, KLM, SAS and BRA are the funding partners for Fly Green Fund. The contributions from corporate customers, such as Löffbergs, Resia, Swedavia and Crip, and by private customers (Swish number: 123 131 4137) are used for 75% for supply of bio jet fuel and for 25% to support production of bio jet fuel in the Nordics. www.flygreenfund.se
