

SkyNRG to announce third sustainable jet fuel customer: Finnair

Amsterdam July 14 2011 – SkyNRG will supply Finnair with sustainable jet fuel this summer. For its first biofuel flight SkyNRG will supply Finnair with jet fuel made from recycled vegetable oil in a mixture that is 50% biofuel and 50% standard fossil fuel. Also Finnair and SkyNRG have agreed to jointly work on a structural supply chain, as both parties firmly believe that the adoption of "green routes" by airlines will help accelerate the development of sustainable and affordable jet fuels.

“We want to be a pioneer in sustainable development in air transport. SkyNRG’s leading approach in setting up innovative supply chains for truly sustainable jet fuel that is long term also affordable made them a logical partner for us” says Kati Ihamäki, Vice President, Sustainable Development at Finnair.

About SkyNRG

SkyNRG is a Dutch company with the mission to help create the market for sustainable jet fuel that is affordable. After two years of research and development the company has created an one-stop shop for airlines integrating the complete supply chain for sustainable jet fuels. From feedstock-to-flight, the supply chain covers elements such as strict selection of sustainable feedstock, refining contracts, distribution to any airport in the world, quality assurance, in to plane fuel service, insurance, marketing and project (co) funding with airports and end customers. For Finnair SkyNRG partners with US refiner Dynamic Fuels and has used as feedstock the waste stream Used Cooking Oil.

SkyNRG does not commit to one single feedstock or technology. The sustainability of alternative jet fuel depends on many factors, which are specific for each single case. To make the right decisions now and in the future, SkyNRG is advised by an independent Sustainability Board (in which 2 renowned NGOs and an academic institute hold a seat). Next to that, SkyNRG strives for harmonisation on certification of sustainable jet fuel and therefore actively supports the Roundtable on Sustainable Biofuels.
