

## **STATOIL FUEL & RETAIL AVIATION AND SKYNRG ANNOUNCE CLOSE CO-OPERATION FOR NORDIC REGION**

**Amsterdam, Stockholm March 4, 2014 – At the start of the World Bio Markets Conference in Amsterdam, Statoil Aviation and SkyNRG announce a long term co-operation towards accelerating the demand for and supply of sustainable jet fuel for the Nordic region. Next to supplying sustainable jet fuel at a premium in the short term, the co-operation will focus on the development of so called SkyNRG BioPorts™ - regional supply chains turning sustainable feedstock and local waste streams into sustainable jet fuel that is price competitive with fossil jet fuel.**

“We foresee that working with SkyNRG will accelerate our strong ambitions to supply the Nordic countries with significant quantities of sustainable jet fuel. We want to ensure we can meet the short and long term future demand from customers, airports and authorities” says Mr. Thorbjörn Larsson, Vice President of Statoil Aviation.

“We are pleased to join forces with the leading aviation fuel company in the Nordic that fully shares our mission: accelerating supply and demand of truly sustainable jet fuel that is also affordable” says Mr. Dirk Kronemeijer, CEO of SkyNRG.

The co-operation expects to announce their first projects in the Nordic region soon.

### **About Statoil Aviation**

Statoil Aviation is the leading regional aviation fuel supplier in Northern Europe with presence in more than 80 airports, supplying international airlines, military, general aviation, resellers and card customers. We comply with the highest quality standards and continuously develop operational excellence. Statoil Aviation takes pride in its service and responsiveness towards its customers' needs. The company holds ISO 9001 and 14001 certifications. For more information and contact please visit [www.statoilaviation.com](http://www.statoilaviation.com)

### **About SkyNRG**

SkyNRG's mission is to create sustainable fuels for those transport segments for which sustainable fuel is the best green alternative in the foreseeable future: aviation, marine and heavy trucking. The company is executing this mission short term via co-funded green routes and long term via developing regional supply chains that represent a real sustainable and affordable alternative for fossil fuels. SkyNRG uses multiple technologies that are best suited for that particular region in the world and is supported by its leading global sustainability and technology board.

SkyNRG is the world's market leader for sustainable kerosene, supplying more than 20 airlines worldwide. Since 2011 the company is expanding into the marine and heavy trucking sustainable diesel segment as well. Learn more about SkyNRG at [www.skynrg.com](http://www.skynrg.com)
